## Gold - the new global currency...

*There was a time when gold was money. The world's major economies have experienced a rapid money supply growth of 10 % plus per annum in recent years, and it is not backed up by gold, as in 'the good old days'. But the yellow metal is returning as a store of value when everything else seems risky. Watch our 4 minutes Intro Presentation.*

### Why invest in gold?

Experts agree, gold will double in value over the next 10 years and they recommend that you invest between 5 and 20 % of your assets in gold. Especially gold from KB Edelmetall is attractive; it is certified and made in small units. You can have your gold stored in Switzerland, and immediately converted it to money, if the need is there.

**Watch the Main Presentation now.**

### Become a KB Partner

There are no fees, no monthly costs and no obligations to buy gold. To be a KB Partner is a great opportunity offered to you. [I want to know more.](#)

## Quality KB gold bullion

All serial numbers are cut with laser. This makes every gold bullion unique. A hologram adorns the rear side of every bullion. Gold bullions adorned with a hologram will always keep their value on the free market.

The certification films are heat sealed and cut to business card in one step. The globally recognised certificate guarantees that the contents are genuine.

KB Edelmetall always offer you the best price, if you consider selling your gold.
